

Alex Morgan

Propulsion. Precision. Reliability.

Rotterdam, Netherlands / alex.morgan@example.com / +00 000 000 000

Marine engineer with a practical focus on propulsion, auxiliary machinery and planned maintenance. Combines disciplined watchkeeping with hands-on fault diagnosis, overhaul preparation and clear technical reporting.

SEA SERVICE & EXPERIENCE

Second Engineer

2023 - 2026

Northline Marine / MV Meridian / Product tanker

MAN B&W 6S50ME-B / 9,480 kW

- Coordinated planned maintenance for propulsion and auxiliaries, aligning work with vessel schedules and permit requirements.
- Prepared dry-dock work scopes, tracked spare parts and supported class survey close-out.

Third Engineer

2020 - 2023

Pelagic Shipping / MV North Passage / Bulk carrier

MAN B&W 6S60MC-C / 13,560 kW

- Maintained diesel generators, fuel separators and compressed-air systems; recorded defects and corrective actions.
- Investigated recurring cooling-system faults using operating trends and structured inspections.

Engineering Cadet

2018 - 2020

Blue Current Fleet / MV Solstice / Ro-Pax ferry

Wartsila 8L46 / twin-engine plant

- Supported engine-room rounds, pump overhauls and safety drills under senior engineer supervision.

TECHNICAL EXPERTISE

Propulsion

Two-stroke diesel / fuel injection / lubrication

Auxiliaries

Generators / purifiers / pumps / compressors

Maintenance

PMS / fault finding / dry-dock preparation

Technical tools

AutoCAD / Excel / technical drawings

QUALIFICATIONS

Second Engineer CoC - STCW III/2

STCW safety training

Engine-room resource management

ENG1 medical - verify before use

EDUCATION & AVAILABILITY

BEng Marine Engineering

Example Maritime Institute / 2018

English / professional working proficiency

Available by arrangement
